Nikesh Khichadiya

Vancouver, BC | +1 236-333-6560 | nikeshkhichadiya@gmail.com | www.linkedin.com/in/nikesh-khichadiya

Summary

Dynamic and results-driven Full Stack Developer with about three years of comprehensive experience in front-end and back-end development. Proven track record in creating and managing responsive web applications using modern technologies like React, Angular, Node.js, and Express. Adept at optimizing website performance, integrating payment gateways, and designing efficient databases. Strong background in collaborating with cross-functional teams to deliver tailored solutions. Proficient in HTML, CSS, JavaScript, TypeScript, and various database management systems. Skilled in problem-solving, debugging, and implementing CI/CD pipelines using Git and AWS. Committed to continuous learning and delivering high-quality, scalable solutions.

Professional Experience

Sun Micro Solution – India   *Full-stack Developer | Aug 2021 to Nov 2022*

During my tenure at Sun Micro Solution – India, I fulfilled the role of a Full-stack Developer. I led the customization of website themes and plugins to cater to client specifications. Additionally, I drove the improvement of e-commerce functionality by seamlessly integrating payment gateways and enhancing website performance. Upholding client satisfaction, I promptly addressed technical issues and contributed to the architectural design by creating REST APIs using Node.js and Express. These efforts were instrumental in ensuring the smooth operation and performance of web applications, thereby enhancing project success.

Logictrix Infotech – India   *Front-end Developer | July 2020 to Aug 2021*

During my time at Logictrix Infotech – India, I served as a Front-end Developer, where I focused on developing and managing web applications using React and Angular. A key aspect of my role involved translating wireframes into responsive code, utilizing HTML, CSS, JavaScript, and SCSS to enhance the user experience. I collaborated closely with back-end developers and UX/UI designers, conducting code reviews and unit tests for efficient problem resolution. Additionally, I proactively optimized website performance by enhancing scripts and libraries, ensuring seamless functionality across various devices and browsers.

Satva Infotech – India   *Front-end Developer and Designer Intern | Jan 2020 – July 2020*

In my role as a Front-end Developer and Designer Intern at Satva Infotech – India, I played a vital part in transforming design mockups into visually appealing and user-friendly web pages. Utilizing HTML, CSS, and JavaScript, I ensured cross-browser compatibility to deliver a consistent experience across various platforms. Additionally, I contributed to user research and usability testing, crafting interactive prototypes for client presentations. Collaboration was central to my work as I partnered with cross-disciplinary team members to seamlessly integrate design elements and functionalities, fostering effective communication and collaboration.

Education

B.E in. Information Technology | July 2016 to Aug 2020   Gujarat Technological University - Gujarat, India
M.S. in Cybersecurity | Jan 2023 to July 2024   New York Institute of Technology - Vancouver, Canada

Technical Skills

Frontend Development: HTML5, CSS3, JavaScript (ES6+), Typescript, JQuery, React.js, Vue.js, Angular. Skilled in crafting responsive designs.

Backend Development: Node.js, Express, MySQL, MongoDB, Firebase. Experienced in RESTful API development and payment gateway integration.

Database Management: SQL, NoSQL databases. Emphasis on database design and optimization.

DevOps & Tools: Git, CI/CD pipelines, AWS for cloud services and deployment.

Additional Skills: Strong problem-solving, debugging, Agile methodologies, communication, and teamwork abilities. Dedicated to continuous learning.
